

STAINED GLASS CARE INSTRUCTIONS

- Avoid mechanical damage to the film coating (cuts, punctures).
- Do not use in rooms with a high degree of humidity (bathrooms, saunas).
- When washing stained glass, do not use abrasive powders, alkaline and alcohol solutions, steel wool and brushes, knives and other sharp objects, so as not to scratch or damage the lead, film or glass. It is recommended to use soft sponges, soap, warm water or glass cleaners that do not contain ammonia or alkali.

ATTENTION!

Do not spray cleaning agent directly on the product! Moisten the cloth and, only then, wipe the stained glass window.

Responsibility for the quality of products manufactured with violation of technology, at the request of the buyer, lies with the buyer. Consent to the manufacture of such products is the payment of the invoice or its confirmation by e-mail.

Notices of all changes made by the manufacturer are published on the company's website.
